Safari Settings for Qwickly on iOS Device

When opening Qwickly attendance from an iOS device, such as an iPhone or iPad, certain settings in Safari may prevent the Qwickly tool from opening properly. If you open Qwickly Attendance from an iOS device and receive an error message, follow the instructions below to confirm your Safari settings and then attempt to open Qwickly again. If any issues persist, contact Academic Technology at canvasIms@colum.edu for assistance.

1. Open settings on your iOS device by selecting the settings gear icon.	Settings		
	Phone >		
2. From the settings list that appears, there will be an option for Safari. Select this option.	Messages >		
3. Locate the option in Safari settings for "Block Popups." Make sure this is turned off, as pictured.	FaceTime		
	🖉 Safari >		

Settings Safari	i	4. Locate the option in Safari settings for "Prevent Cross-Site Tracking." Make sure this is turned off, as pictured.
GENERAL		5 Locate the option in Safari settings for "Block All
AutoFill	>	Cookies." Make sure this is turned off, as pictured.
Favorites	Favorites >	6. Refer back to your Canvas course and open Qwickly
Block Pop-ups		from your iOS device.
