

How to Add a Panopto Video to a Canvas Page

1. Sign into Canvas at canvas.colum.edu with your Office 365 Credentials.
2. Click on the course that you'd like to add a Panopto video to.
3. Go to the Canvas page that you would like to add a Panopto video within and click "Edit."
 - This can also be done in an assignment, discussion forum, or quiz.
4. From the editing toolbar, click on the electrical plug icon that appears and select "view all."
5. Click "Panopto Video" from this list that appears.

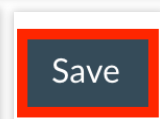

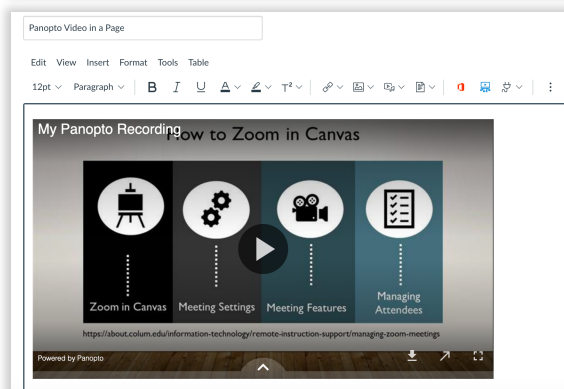

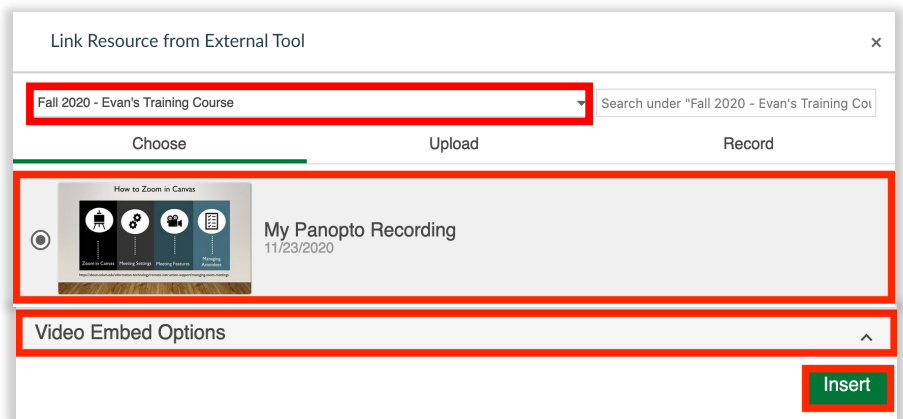

6. Videos that you have already recorded in Panopto will appear. Select the video that you would like to add to your Canvas module from your Panopto course folder.

- By default, only videos in your Canvas course's Panopto folder will appear. Click on the title of the course folder in this space to search for videos that you have in different Panopto folders.

7. If you would like to change the size or aspect ratio of your video or enable "auto-play" for your students, click on "Video Embed Options" to adjust these settings. This is optional.

8. Click "inset" when you are ready to continue. Your video will now appear on your Canvas page.

9. Click "save" to complete the process of adding a Panopto video to a Canvas page.
