

Updating Your Zoom Client to the Latest Version

1. Open your Zoom client from within your applications.
2. Click on the account icon in the top right once the Zoom client is open.
 - This typically has your initials or profile image displayed.
3. Click on the “Check for Updates” option.
4. If an update of Zoom is available, Zoom will indicate this. A description of the update will be listed.
5. Click on the “update” option to proceed.

6. A new button will appear that reads “install.” Click on this to proceed.

7. Follow the prompts that appear on your computer to confirm the installation of the Zoom update. Once complete, you will receive a confirmation and Zoom will re-open.
 - You may be prompted to log back into your Zoom app at this point. If this applies to you, proceed with steps 8-10.

Update Available

New version 5.2.3 (45131.0907) is available. You have 5.2.2 (45106.0831).

Release notes of 5.2.3 (45131.0907)

Changes to existing features

-Disable telephone options for Webinar attendees

We have temporarily disabled the telephone options for webinar attendees in Zoom version 5.2.3 and plan to re-enable them in the next few weeks. In the meantime, attendees may connect to Webinar audio through the Zoom desktop client, web client, or mobile app. Webinar hosts and panelists can still join by telephone, as well as through computer audio.

Resolved Issues

-Minor bug fixes

Release notes of 5.2.2 (45106.0831)

Meeting/webinar features

-Custom languages for language interpretation

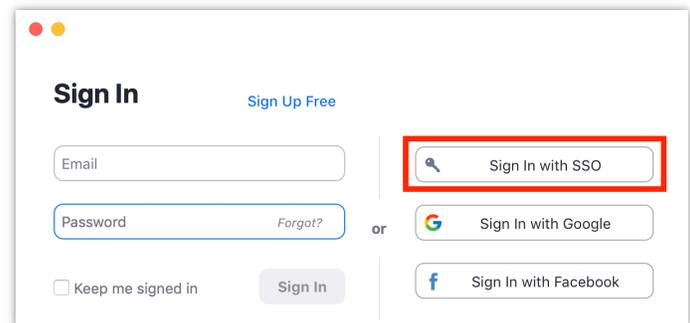

-High Fidelity Audio mode
